

A SUMMARY OF YOUR MULPLEO® (LUSUTROMBOPAG) TREATMENT

This is a patient material, only for patients already prescribed Mulpleo.

If you would like more information on Mulpleo or your condition, please visit www.makeitcount.eu

You've been prescribed Mulpleo to increase your platelet count ahead of a procedure

Mulpleo is an oral tablet, to be swallowed whole once a day, with or without food

You need to take Mulpleo for 7 days

You then need to wait at least 2 days after your last dose

Your procedure will be performed from day 9 onwards, at the discretion of your healthcare provider

Please also read the patient information leaflet that comes with your medication.

▼ This medicine is subject to additional monitoring. This will allow quick identification of new safety information. You can help by reporting any side-effects you may get. See <https://yellowcard.mhra.gov.uk/> for how to report side-effects.
